KEY FEATURES

Bossklein IDactiv Instrument Disinfectant is ideally suited for the manual disinfection of a variety of instruments, tools, burs and other endodontic items - prior to sterilisation.

Safe to use inside both the instrument and ultrasonic baths, the unique 2 in 1 formulation actively removes debris from instruments before attacking micro-organisms that remain on the surface.

EN 21530 testing ensures compatibility with a wide range of different materials while preserving instrument quality. The unique formulation contains a corrosion inhibitor and is totally free from chlorides, this ensures your instruments and tools remain in perfect condition after disinfection.

The composition of Bossklein IDactiv does not contain PHMB and consists of greener and less hazardous chemical components making everyday handling and usage much safer for both the user and the environment.

This highly effective formula has been tested to EN 14476 for proven effectiveness against all enveloped viruses including Coronavirus, Hepatitis B and C and HIV. It is also active against Bacteria, Yeast, Tuberculosis and non-enveloped Viruses Adenovirus and Norovirus (see table opposite for full details)

A concentrated solution, IDactiv and has an economical dilution ratio of only 2% or 4% and a mild fresh aroma, unlike other instrument disinfectants that smell of harsh chemicals.

COMPOSITION

Aqua, N-(3-Aminopropyl)-N-Dodecylpropane-1,3-Diamine, N,N-Didecyl-N-Methyl-Poly(Oxyethyl) Ammonium Propionate, Alcohols, C9-11, Ethoxylated, Tetrasodium N,N-Bis(Carboxylatomethyl)-L-Glutamate, Monoethanolamine, Corrosion Inhibitor, Aroma, Dye.
