

Extended release... available in three flavours: cherry, melon or mint.

3M™ Clinpro™ 5% Sodium Fluoride White Varnish with Tri-calcium phosphate

Most patients don't know the benefit of keeping a fluoride varnish in contact with their teeth longer.

Studies show the longer a fluoride varnish stays in contact with the teeth, the more effective it is.¹ Tri-Calcium Phosphate (TCP) delivers targeted and sustained release of fluoride, calcium and phosphate for up to 24 hours.*

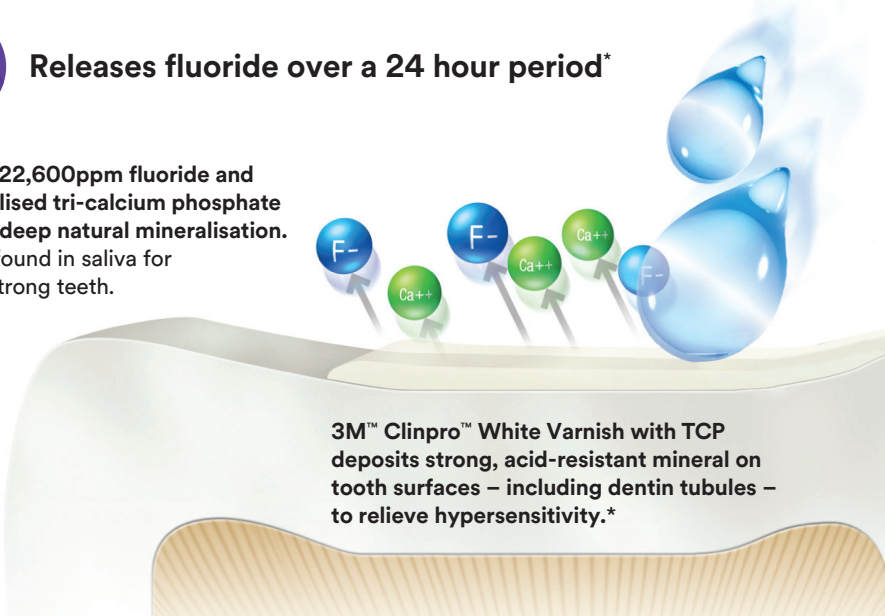

Advanced protection – durable, long-lasting coating

Releases fluoride over a 24 hour period*

Contains 22,600ppm fluoride and functionalised tri-calcium phosphate (TCP) for deep natural mineralisation. Minerals found in saliva for building strong teeth.

Summary of advantages

- ▶ Contains 22,600ppm sodium fluoride
- ▶ Contains tri-calcium phosphate (TCP) for deep natural mineralisation
- ▶ Easy to apply, no drying needed
- ▶ Contains xylitol
- ▶ Can be applied to tooth surfaces where plaque is present*
- ▶ Fast, horizontal sweep application
- ▶ Unique applicator for back-of-glove dispensing
- ▶ Does not change the appearance of ceramic or metal orthodontic brackets*
- ▶ Relieves hypersensitivity*
- ▶ Over 10 years of clinical success

High fluoride uptake, even after acid attack.

3M™ Clinpro™ White Varnish

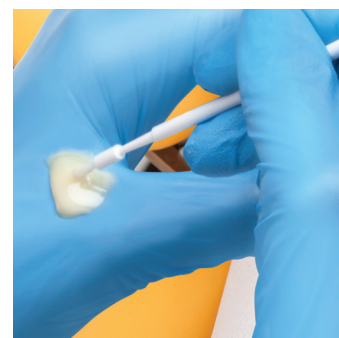

Test results show the high fluoride uptake during a 24-hour treatment of Clinpro White Varnish with TCP is virtually unaffected by acid challenge.

It's the varnish that won't leave their teeth when they leave your chair.

Simply swipe 3M™ Clinpro™ 5% Sodium Fluoride White Varnish with TCP across tooth surfaces and let the formula do the rest.

- ▶ No need to dry the teeth – sets in the presence of saliva
- ▶ No rinsing – the patient may eat and drink immediately after application
- ▶ Saliva-tolerant – spreads to help coat even more tooth surfaces, releasing fluoride, calcium and phosphate for up to 24 hours*

Dispense 3M™ Clinpro™ White Varnish onto a mixing surface. For easy application, squeeze it onto the gloved hand like a painter's palette, so you can efficiently deliver varnish to the patient.

Apply Clinpro White Varnish with TCP evenly in a thin layer over treatment area(s) with sweeping, horizontal brush strokes. No suction required.

Pack size 50

Pack size 100

Ordering information

Item	Product information
	3M™ Clinpro™ 5% Sodium Fluoride White Varnish with Tri-calcium phosphate – 50 pack Each 50 pack includes: 50 unit-dose packets (0.5ml each) of one flavour and applicator brushes in individual foil pouches
12249C	Cherry flavour
12249L	Melon flavour
12249	Mint flavour
	3M™ Clinpro™ 5% Sodium Fluoride White Varnish with Tri-calcium phosphate – 100 pack Each 100 pack includes: 100 unit-dose packets (0.5ml each) of one flavour; 100 applicator brushes
12250C	Cherry flavour
12250L	Melon flavour
12250	Mint flavour
