SDI RIVA LUTING PLUS RESIN REINFORCED GLASS IONOMER CEMENT

RESIN REINFORCED GLASS IONOMER LUTING CEMENT

Riva Luting Plus is a resin modified, self curing, glass ionomer luting cement, designed for final cementation of metal, PFM and resin crowns, bridges, inlays and onlays plus ceramic inlays and crowns. Riva Luting Plus chemically bonds to dentine, enamel and all types of core material.

Riva Luting Plus utilises SDI's proprietary *ionglass*[™] filler developed by our glass technologists. *ionglass*[™] is a radiopaque, high ion releasing, reactive glass used in SDI's range of dental cements. Riva Luting Plus releases substantially higher fluoride to assist with remineralisation of the natural dentition.

♦ ionglass

10µM LOW FILM THICKNESS

CLINICALLY INSOLUBLE

Riva Luting Plus is clinically insoluble when set. It has a very low acid erosion value. This improves the longevity of the restoration, resisting disintegration and wear caused by oral acidity. The ISO Standard dictates that a material cannot have acid erosion of more than 0.17mm.

DEPTH OF ACID EROSION

						0.05
						0.25
	TING CEMEN	T×				0.05
		I				0.16
ISO STANE	JARD					0.17
0	0.05	0.10	0.15	0.20	0.25	mm

FLEXURAL STRENGTH

Ensuring reduced cracking and failure in flexion, Riva Luting Plus' high flexural strength ensures longevity of the restoration.

HIGH BOND STRENGTHS

Adequate adhesion to human tooth structure is important for long term retention of restorations. Riva Luting Plus has excellent adhesion to dentine and zirconia. It is great for luting ceramic crowns and inlays.

DENTINE - SHEAR BOND STRENGTH**

ADVANTAGES

Chemically adheres to tooth structure and metal substrates
BPA & HEMA free
Very low film thickness – flows easily between restoration and tooth
Easy to clean up
Low water solubility - increased longevity and aesthetics
High bond strengths
High fluoride releasing ability
Bioactive proprietary <i>ionglass™</i> technology - high ion exchange
Great for PFM crowns, metal posts, orthodontic bands, implants
Light yellow shade
INDICATIONS
Cementation of resin, metal, or porcelain

fused to metal inlays, onlays, bridges and crowns

Cementation of ceramic inlays and crowns

Cementation of pins, posts and screws

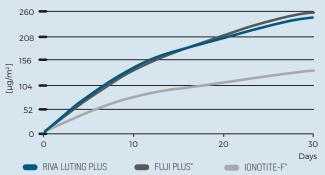

HIGH FLUORIDE RELEASE

Due to Riva Luting Plus's *ionglass™* filler, it releases substantially higher fluoride to assist with remineralisation of the natural dentition.

SETTING TIMES

There will be minimal loss of working time when using Riva Luting Plus. With adequate working time and a quick setting property, Riva Luting Plus will shorten chair time and ensures early resistance to mastication forces.

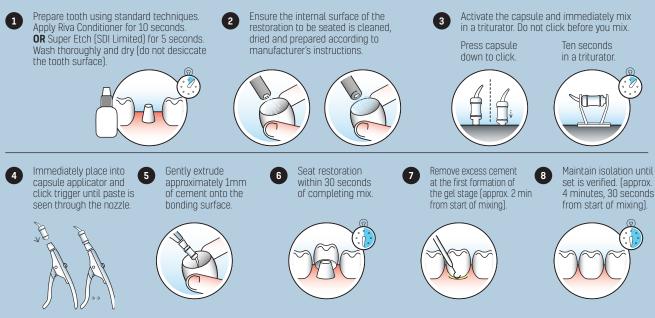

CUMULATIVE FLUORIDE RELEASE**

TIMES
